MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 60 (1991)

β-Adrenergic receptors, rat left ventricle, ageing, muscarinic receptors, propranolol, atropine, 215
β-Adrenergic responses, hypoxia, aging, rat lung, 135
Age-related decrease in PGI_2 production, cellular ageing of endothelial cells, intracellular lipid peroxidation, 35
Ageing, beta-adrenergic receptors, muscarinic receptors, vasa nevorum, rat, 255
Ageing, human muscle mitochondria, respiratory complex protein composition, 295
Ageing, posterior pituitary, supraoptic nucleus, vasopressin, neurophysin, axonal transport, 113
Ageing, rat left ventricle, muscarinic receptors, β-adrenergic receptors, propranolol, atropine, 215
Ageing of skeletal muscle, atrophy of muscle, muscle fiber area, muscle glycolytic enzymes, muscle respiratory enzymes, 199
Aging, β-adrenergic responses, hypoxia, rat lung, 135
Aging, brain tumor, mortality, epidemiology, 225
Aging, breast cancer, mortality, epidemiology, 123
Aging, cellular senescence, tumor promoters, dermis, Syrian hamster, 143
Aging, drug metabolism, smoking, arylhydrocarbon hydroxylase, monocytes, 61
Aging, hepatocyte, insulin, hyperpolarisation, Na,K-ATPase, 55
Aging, messenger RNA, myocardium, 285
Aging, mitochondria, oxy-radicals, free radicals, oxygen, muscle, 189
Aging, prostate cancer, mortality, epidemiology, 243
Aging, psychoneuroendocrinoimmunology, lymphocyte subsets, cutaenous delayed hypersensitivity, 1
Aging, psychoneuroendocrinoimmunology, lymphocyte blastogenesis, interleukins, interferon, NK activity, 13 Aging, skeletal muscle, regeneration, muscle fiber branching, muscle grafts, 43
Aging, theroretical model, spatio-temporal organization, 99
Arterial smooth muscle cells, growth retardation, hypothalamic stimulation, 89
Atrial muscle, F344 rats, force-frequency relationship, Na^+ influx and efflux, senescence, 303
Arylhydrocarbon hydroxylase, aging, drug metabolism, smoking, monocytes, 61
Atrophy of muscle, ageing of skeletal muscle, muscle fiber area, muscle glycolytic enzymes, muscle respiratory enzymes, 199
Atropine, rat left ventricle, ageing, muscarinic receptors, β-adrenergic receptors, propranolol, 215
Axonal transport, ageing, posterior pituitary, supraoptic nucleus, vasopressin, neurophysin, 113
Axon outgrowth, cell culture, cerebral cortex, human, neuronal death, 171

Beta-adrenergic receptors, muscarinic receptors, vasa nevorum, ageing, rat, 255
Biological aging, factorial structure, hierarchial factor solution, primary aging factor, 153
Bone resorption, calcium homeostasis, dezamethasone, 1α,25-dihydroxycholecalciferol, indomethacin, parathyroid hormone, prostaglandin E_2, 25
Brain, dietary fat and oils, survival, linolenic acid, docosahexaenoic acid, liver, 267
Brain tumor, mortality, aging, epidemiology, 225
Breast cancer, mortality, aging, epidemiology, 123
Buoyant density, protein bound DNA, DNA absorption to mica, 275
Calcium homeostasis, bone resorption, dezamethasone, 1α,25-dihydroxycholecalciferol, indomethacin, parathyroid hormone, prostaglandin E_2, 25
Cellular ageing of endothelial cells, age-related decrease in PGI_2 production, intracellular lipid peroxidation, 35
Cellular senescence, aging, tumor promoters, dermis, Syrian hamster, 143

Cell culture, axon outgrowth, cerebral cortex, human, neuronal death, 171
Cerebral cortex, axon outgrowth, cell culture, human, neuronal death, 171
Cutaenous delayed hypersensitivity, aging, psychoneuroendocrinoimmunology, lymphocyte subsets, 1

Dermis, aging, cellular senescence, tumor promoters, Syrian hamster, 143
Development, drug metabolism, dietary restriction, liver, 75
Dezamethasone, bone resorption, calcium homeostasis, 1α,25-dihydroxycholecalciferol, indomethacin, parathyroid hormone, prostaglandin E_2, 25
Dietary fat and oils, survival, linolenic acid, docosahexaenoic acid, brain, liver, 267
Dietary restriction, drug metabolism, development, liver, 75
1α,25-Dihydroxycholecalciferol, bone resorption, calcium homeostasis, dezamethasone, indomethacin, parathyroid hormone, prostaglandin E_2, 25
DNA absorption to mica, protein bound DNA, buoyant density, 275
Docosahexaenoic acid, dietary fat and oils, survival, linolenic acid, brain, liver, 267
Drug metabolism, aging, smoking, arylhydrocarbon hydroxylase, monocytes, 61
Drug metabolism, dietary restriction, development, liver, 75

Epidemiology, brain tumor, mortality, aging, 225
Epidemiology, breast cancer, mortality, aging, 123
Epidemiology, prostate cancer, mortality, aging, 243

F344 rats, atrial muscle, force-frequency relationship, Na^+ influx and efflux, senescence, 303
Factorial structure, biological aging, hierarchial factor solution, primary aging factor, 153
Force-frequency relationship, atrial muscle, F344 rats, Na^+ influx and efflux, senescence, 303
Free radicals, mitochondria, oxy-radicals, aging, oxygen, muscle, 189

Growth retardation, arterial smooth muscle cells, hypothalamic stimulation, 89

Hepatocyte, aging, insulin, hyperpolarisation, Na,K-ATPase, 55
Hierarchial factor solution, biological aging, factorial structure, primary aging factor, 153
Human, axon outgrowth, cell culture, cerebral cortex, neuronal death, 171
Human muscle mitochondria, respiratory complex protein composition, ageing, 295
Hyperpolarisation, aging, hepatocyte, insulin, Na,K-ATPase, 55
Hypothalamic stimulation, growth retardation, arterial smooth muscle cells, 89
Hypoxia, β-adrenergic responses, aging, rat lung, 135

Indomethacin, bone resorption, calcium homeostasis, dezamethasone, 1α,25-dihydroxycholecalciferol, parathyroid hormone, prostaglandin E_2, 25
Insulin, aging, hepatocyte, hyperpolarisation, Na,K-ATPase, 55
Interferon, aging, psychoneuroendocrinoimmunology, lymphocyte blastogenesis, interleukins, NK activity, 13
Interleukins, aging, psychoneuroendocrinoimmunology, lymphocyte blastogenesis, interferon, NK activity, 13
Intracellular lipid peroxidation, cellular ageing of endothelial cells, age-related decrease in PGI_2 production, 35

Linolenic acid, dietary fat and oils, survival, docosahexaenoic acid, brain, liver, 267
Liver, dietary fat and oils, survival, linolenic acid, docosahexaenoic acid, brain, 267
Liver, drug metabolism, dietary restriction, development, 75
Lymphocyte blastogenesis, aging, psychoneuroendocrinoimmunology, interleukins, interferon, NK activity, 13
Lymphocyte subsets, aging, psychoneuroendocrinoimmunology, cutaenous delayed hypersensitivity, 1

Messenger RNA, aging, myocardium, 285
Mitochondria, oxy-radicals, aging, free radicals, oxygen, muscle, 189
Monocytes, aging, drug metabolism, smoking, arylhydrocarbon hydroxylase, 61
Mortality, brain tumor, aging, epidemiology, 225
Mortality, breast cancer, aging, epidemiology, 123
Mortality, prostate cancer, epidemiology, aging, 243
Muscarinic receptors, beta-adrenergic receptors, vasa nevorum, ageing, rat, 255

Muscarinic receptors, rat left ventricle, ageing, β-adrenergic receptors, propranolol, atropine, 215
Muscle, mitochondria, oxy-radicals, aging, free radicals, oxygen, 189
Muscle fiber area, ageing of skeletal muscle, atrophy of muscle, muscle glycolytic enzymes, muscle respiratory enzymes, 199
Muscle fiber branching, skeletal muscle, regeneration, aging, muscle grafts, 43
Muscle glycolytic enzymes, ageing of skeletal muscle, atrophy of muscle, muscle fiber area, muscle respiratory enzymes, 199
Muscle grafts, skeletal muscle, regeneration, aging, muscle fiber branching, 43
Muscle respiratory enzymes, ageing of skeletal muscle, atrophy of muscle, muscle fiber area, muscle glycolytic enzymes, 199
Myocardium, aging, messenger RNA, 285

Na^+ influx and efflux, atrial muscle, F344 rats, force-frequency relationship, senescence, 303
Na,K-ATPase, aging, hepatocyte, insulin, hyperpolarisation, 55
Neuronal death, axon outgrowth, cell culture, cerebral cortex, human, 171
Neurophysin, ageing, posterior pituitary, supraoptic nucleus, vasopressin, axonal transport, 113
NK activity, aging, psychoneuroendocrinoimmunology, lymphocyte blastogenesis, interleukins, interferon, 13

Oxy-radicals, mitochondria, aging, free radicals, oxygen, muscle, 189
Oxygen, mitochondria, oxy-radicals, aging, free radicals, muscle, 189

Parathyroid hormone, bone resorption, calcium homeostasis, dezamethasone, 1α,25-dihydroxycholecalciferol, indomethacin, prostaglandin E_2, 25
Posterior pituitary, ageing, supraoptic nucleus, vasopressin, neurophysin, axonal transport, 113
Primary aging factor, biological aging, factorial structure, hierarchial factor solution, 153
Propranolol, rat left ventricle, ageing, muscarinic receptors, β-adrenergic receptors, atropine, 215
Prostaglandin E_2, bone resorption, calcium homeostasis, dezamethasone, 1α,25-dihydroxycholecalciferol, indomethacin, parathyroid hormone, 25
Prostate cancer, mortality, epidemiology, aging, 243
Protein bound DNA, buoyant density, DNA absorption to mica, 275
Psychoneuroendocrinoimmunology, aging, lymphocyte subsets, cutaenous delayed hypersensitivity, 1
Psychoneuroendocrinoimmunology, aging, lymphocyte blastogenesis, interleukins, interferon, NK activity, 13

Rat, beta-adrenergic receptors, muscarinic receptors, vasa nevorum, ageing, 255
Rat left ventricle, ageing, muscarinic receptors, β-adrenergic receptors, propranolol, atropine, 215
Rat lung, β-adrenergic responses, hypoxia, aging, 135
Regeneration, skeletal muscle, aging, muscle fiber branching, muscle grafts, 43
Respiratory complex protein composition, human muscle mitochondria, ageing, 295

Senescence, atrial muscle, F344 rats, force-frequency relationship, Na^+ influx and efflux, 303
Skeletal muscle, regeneration, aging, muscle fiber branching, muscle grafts, 43
Smoking, aging, drug metabolism, arylhydrocarbon hydroxylase, monocytes, 61
Spatio-temporal organization, aging, theroretical model, 99
Suparoptic nucleus, ageing, posterior pituitary, vasopressin, neurophysin, axonal transport, 113
Survival, dietary fat and oils, linolenic acid, docosahexaenoic acid, brain, liver, 267
Syrian hamster, aging, cellular senescence, tumor promoters, dermis, 143

Theroretical model, aging, spatio-temporal organization, 99
Tumor promoters, aging, cellular senescence, dermis, Syrian hamster, 143

Vasa nevorum, beta-adrenergic receptors, muscarinic receptors, ageing, rat, 255
Vasopressin, ageing, posterior pituitary, supraoptic nucleus, neurophysin, axonal transport, 113
